JOÃO GUILHERME DE PAULA ABREU

Java Back-end Internship | Spring Boot | REST APIs | PostgreSQL
Brazil — Rio de Janeiro • jgabreudev@gmail.com • LinkedIn | GitHub

ABOUT ME

Computer Science student at Universidade Veiga de Almeida (UVA), currently in my second semester, with graduation expected in 2029. I build back-end services with Java and Spring Boot and develop REST APIs using PostgreSQL. Seeking a Java back-end development internship.

EDUCATION

Bachelor of Science in Computer Science Universidade Veiga de Almeida — Rio de Janeiro, RJ | 2026 – 2029 (Expected)

• Relevant coursework: Programming Logic, Algorithms and Data Structures, Object-Oriented Programming, Computer Architecture, Fundamentals of Systems.

SKILLS

Languages & Frameworks: Java 21, Spring Boot (primary); Python and TypeScript (additional)

Architecture & Practices: OOP, JPA/Hibernate, Maven, Clean Code, REST APIs, JUnit 5, Mockito

Database: PostgreSQL, SQL

Tools & Platforms: Docker Compose, Git, GitHub Actions, Insomnia

Languages: Portuguese (Native), English (Intermediate)

RELEVANT PROJECTS

Tutoring Management System (Personal Project) - GitHub

• Built the back end of the Tutoring Management System with Java 21, Spring Boot and PostgreSQL. Implemented automatic promotion of students from the waitlist when spots become available and transactional notifications to keep operations consistent. The project includes 61 automated tests with JUnit 5 and Mockito and CI with GitHub Actions.
